Projects

E-commerce Website

E-commerce website for vintage clothes. Featuring the integration of a shopping cart, cart summary, and preview system. A list of products and utilized React Router for each page such as login, creating an account, and a page for each product.

Weather Web App (API)

A weather forecast app, showing current weather and the next five days' forecast. The app utilizes Weather API and GEO API for the city's data, with implemented async pagination for a better user experience with city suggestions.
