About**Me**

A highly motivated and detail-oriented Front-End Developer with 2 years of experience at WebDev Canada. My ambition is to secure a position as a Front-End Developer where I can utilize my skills and experience to contribute to the success of the company while continuously learning and growing.

EXPERIENCE

WebDev Canada, Toronto — *Front-End Developer*

2021 - 2023

- Used React.JS, JavaScript, Bootstrap, and Sass to create dynamic user components and improve website performance
- Collaborated with Back-End team to integrate front-end with back-end functionality
- Developed and maintained websites to ensure cross-browser compatibility and optimized user performance
- Contributed to the company's codebase to fix bugs, add new future, and improve overall code quality

Projects

E-commerce Website

E-commerce website for vintage clothes. Integrated shopping cart to the web app, cart summary, and preview. A list of products and utilized React Router for each page such as login, creating an account, and a page for each product.

Notes App

Note Taking app built in React JS. The primary function of this app is to create, edit, and delete notes.

Weather Web App (API)

A weather forecast app, showing current weather and the next five days. The app utilizes Weather API and GEO API for the city's data, with implemented async pagination for a better user experience with city suggestions.
